

Test Script

Hello everybody, as you know my teammates and I are developing a Google Chrome extension for tracking changes in mood of a person after using social media for an extended amount of time. You will be asked to perform several tasks that are used within the system in order to see how usable the system is. There is no right or wrong answer to using the system, and feedback while testing the system is greatly appreciated.

Before we start, we would like to ask you to fill out this questionnaire.

“Give questionnaire to testers”

Any questions?

“Q/A before starting”

Here are the lists of tasks you will have to perform for the 3 prototypes.

“Tester reads task description”

So let's get started with prototype A! Begin by creating an account for the system.

“Performs task 1”

Perfect! Now login to the system with the credentials you just used.

“Performs task 2”

Now after simulating entering facebook, the extension will prompt you to rate your mood.

“Performs task 3”

Now after an imaginary time gap of an hour, you leave the site and the extension will prompt you again to rate your mood.

“Repeat task 3”

Now you will be prompted to the Results page, take a look and try to look at the graph and the move on to the suggestions.

“Performs task 4”

Now you are in the suggestions part of the system, try removing the first suggestion from your recommended list

“Performs task 5”

Now proceed to accept the displaying activity.

“Performs task 6”

Now to cap off the prototype A test, please log out!

“Performs task 7”

Perfect, now let's get into the next prototype.

“Time for small break or jump right into the next prototype”

Now for prototype B, begin again by registering

“Performs task 1”

Now login to the system.

“Performs task 2”

Now after simulating entering facebook, the extension will prompt you to rate your mood.

“Performs task 3”

Now after an imaginary time gap of an hour, you leave the site and the extension will prompt you again to rate your mood.

“Repeat task 3”

Now you will be prompted to the Results page, take a look and try to look at the graph and the move on to the suggestions.

“Performs task 4”

Now you are in the suggestions part of the system, try removing the first suggestion from your recommended list

“Performs task 5”

Now proceed to accept the displaying activity.

“Performs task 6”

Now to cap off the prototype B test, please log out!

“Performs task 7”

Almost done! Now let's move onto the last prototype. Now create an account.

“Performs task 1”

Now login to the system.

“Performs task 2”

Now after simulating entering facebook, the extension will prompt you to rate your mood.

“Performs task 3”

Now after an imaginary time gap of an hour, you leave the site and the extension will prompt you again to rate your mood.

“Repeat task 3”

Now you will be prompted to the Results page, take a look and try to look at the graph and the move on to the suggestions.

“Performs task 4”

Now you are in the suggestions part of the system, try removing the first suggestion from your recommended list

“Performs task 5”

Now proceed to accept the displaying activity.

“Performs task 6”

Now log out of the system.

“Performs task 7”

Excellent! All the tasks we were supposed to cover are complete, now please fill in this post questionnaire to finish off.

"Post Questionnaire is being filled in"

Thank you for your participation and have a great rest of your day!
